- SomnoDent Reviews and Patient Testimonies

**SomnoDent® with Compliance Recorder (CR)**  
 provides a new treatment option to transportation  
 workers with Obstructive Sleep Apnea

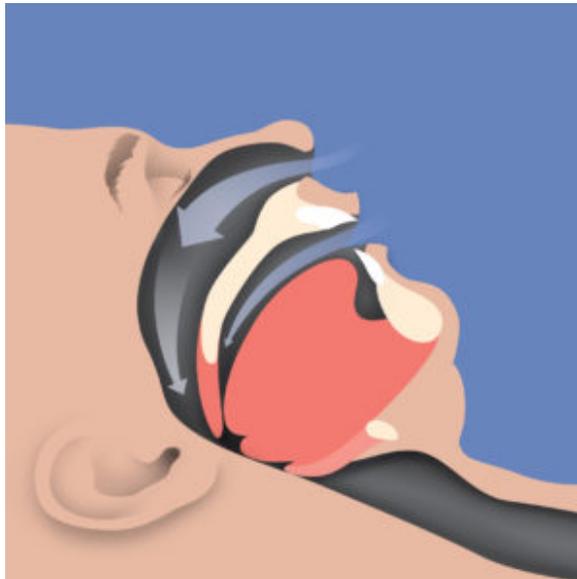

**Empiris** (https://somnomed.com/transportation/)

SomnoDent with CR is the first oral device with compliance recording technology, providing patients with similar comp and apnea scores to CPAP.

- Measures hours worn and head position
- Delivers daily patient summaries to a HIPAA secure, cloud-based system
- Patient and practice records are secure and accessible from anywhere

**Asleep at the Wheel. Untreated Obstructive Sleep Apnea (OSA)**

While we sleep, gravity and muscle relaxation allows the tongue and surrounding soft tissue to fall back into the throat area, collapsing the airway and obstructing the air flow. People with undiagnosed and untreated OSA are typically exhausted and prone to doze off during the day. Behind the wheel of a large vehicle, the results can be catastrophic.

### **SomnoDent® with Compliance Recorder**

Worn during sleep, SomnoDent® oral devices treat with COAT (Continuous Open Airway Therapy)®, by fitting over the upper and lower teeth. SomnoDent® oral devices treat OSA by moving the lower jaw slightly forward. This forward movement keeps the airway open, preventing apneas during sleep. Achieve this level of treatment with SomnoDent with Compliance Recorder (CR), which is an oral device with similar compliance features as CPAP.

**The Department of Transportation and Federal Motor Carrier Safety Administration are evaluating OSA treatment with compliance recommendations, explore your options and find a SomnoDent provider:**
